LEARN TO CREATE:

- Robots, monsters & aliens
- People, animals & plants
- Vehicles, bridges & buildings
- Industrial & mechanical parts
- Landscapes & terrain
- Jewelry & toys
- Anything you can imagine

EXPAND YOUR ARTISTIC TALENTS INTO A NEW DIMENSION

If you’ve ever wondered how Hollywood studios and video game developers create giant robots, creepy aliens and futuristic landscapes, Palo Alto College is now offering an exploratory class in 3D Modeling, sculpting, painting & rendering to reveal the secrets.

This course introduces students to traditional 3D design approaches (polygonal and subdivision modeling) in addition to innovative techniques (voxel modeling & sculpting). Students will learn to use 3D lighting and rendering to showcase their creations.

Course tuition includes digital textbook. Classes are available evenings and online.
