Security is everyone’s business!
ST. PHILIP'S COLLEGE
National Center of Academic Excellence in Information Assurance

Business Information Solutions
a Department of Excellence and Integrity
TODAY IS A NEW OPPORTUNITY
CYBER SECURITY:
CYBER FIRST RESPONDERS PROGRAM
The project’s goal is to educate and prepare cyber first responders to increase the number of professionals in the information assurance and cyber security workforce who are highly trained to prevent, detect, respond to, and recover from cyber security incidents impacting one or more organizations.

This program will produce a skilled group of cyber first responders capable of implementing basic cyber security prevention measures, collaboratively identifying intrusive activity when it occurs using research-based best practices to respond to incidents from an organizational viewpoint, and implementing innovative approaches to resolve incidents that impact more than a single organization.
① Africa will be a new cybercriminal safe harbor.
In order to be successful we shouldn’t reach a level of success and stop! Constantly direct yourself to improve your skills and get better at what you do!
