

**Kid’s Summer Camps 2015**

**Chemical Actions and Reactions (1 week)**
**June 8th-12th**
Experimentation is the theme of this exciting science-based camp. If your child loves to create potions, watch things ooze, fizz, and explode then this is the right camp. Kids explore the worlds of chemistry and physics and learn by testing basic scientific principles in a safe, supervised, and fun environment.

**Wise Wizards (1 week)**
**June 15th-19th**
Want to learn tricks that will surprise and astound your friends and family? Be sure to sign up for this amazing interactive camp. Campers learn incredible feats of magic like card tricks, slight-of-hand, juggling, and puppetry. Learning the art of illusion is a great way for kids to boost self-confidence, increase self-discipline, and develop their presentation skills. Both the timid and adventuresome discover that they can master things they never dreamt they could. Every day is filled with fun, laughter and surprises. Join us and learn to be a wise wizard – learn to perform!

**The Artist in You (1 week)**
**June 22nd-26th**
This camp is jam packed with creative and artistic activities. We use a wide range of mediums and techniques to provide a unique art experience for each camper. Our teachers provide a positive, nurturing and fun environment so campers feel empowered to be creative and expressive in their own special way. Watch your child’s imagination soar during this camp!
Rock Star Super Jam (3 days)  
June 29th-July 1st
Get into the groove with this fun filled 3-day camp. Campers will journey through the world of dance, music, and song, and ultimately party like rock stars. They will enjoy rock and roll crafts and get their creative juices flowing when we rock out in our own music video! Come and join us so we can get this party started!

No prior experience necessary.

Super Hero Academy (1 week)  
July 6th-10th
This camp will be an unforgettable adventure for your child. We will examine the special powers of some of the most popular super heroes. During the camp kids will discover a Super Hero lives inside each of them. Our teachers will help them recognize and value their own special skills and write their own heroic stories. Campers will stand shoulder to shoulder with fellow heroes while they solve ancient mysteries, defend the land, and win back long lost treasures.

Totally Gross Science (1 week)  
July 13th-17th
This camp gets messy with gross science experiments that kids just love! All sorts of gooey, yucky science is covered...some of which will end up on you kids! The point of this camp is to engage kids in science in a fun way. This is certainly not your typical science class and it is also not for the faint-hearted....what could make a kid happier!
Camp Olympics (1 week)
July 20th-July 24th
Go for the gold at our Camp Olympics. Train like an Olympic athlete, show your team spirit, and participate in our crazy but fun Olympic Games. The week will end with a Medal Ceremony where every child finds they are a winner.

Back to the Future (1 week)
July 27th-31st
Let’s face it, at some point we all dreamt of becoming archaeologist and living the adventures of Indiana Jones or Laura Croft! Well, now is the time... but not for you... it’s for your kid’s! Many of them may never have seen the movies but in this camp the adventures are recreated for them to actually experience. We are going back to the future Indiana Jones and Laura Croft-style. During this adventurous camp kids will use their critical thinking skills to avoid perilous traps and elude daring diversions. In addition, they will increase their cognitive skills when using sense of direction and spatial navigation to search for ancient artifacts and lost treasure. You don’t want to miss this one!

Infinity and Beyond (1 week)
August 3rd-7th
Bring your curiosity and check out our newest camp where kids will participate in fun activities set in an exciting learning environment. Campers will blast off into outer space for a week full of fun exploring the universe. We will discover what it’s like to be an astronaut, learn what black holes are, and scrutinize whether aliens really do exist. Our highly skilled instructors will plant the seeds necessary to cultivate the next generation of rocket scientists. Science has never been so much fun!
You Need Water for What? (1 week)
August 10th – 14th
During this camp kids will learn just how important and vital water is to our everyday lives. The camp is filled with fun projects and activities that illustrate where our water comes from, how it is treated, and how to conserve it so we can continue to use it for everything from swimming to making pizza.

High School Summer Camps

3D Animation (9th -12th grades only!)
July 20th-24th
Computer animation is one of the most vital career fields in the entertainment industry for creating animated films, TV, video games, and other exciting digital media.

During this camp, students will learn professional skills enabling them to bring a character to life on the screen. By the end of the camp, students will have created their own amazing 3D short film that can be shared with friends and family. There is no prerequisite for this camp.

3D Printing (9th – 12th grades only!)
July 27th-31st
3D printing is a leading new field that puts rapid prototyping, customizable products, and individualized medical appliances in reach of the general public.

This revolutionary camp teaches students how to use various 3D modeling software to design and model their own distinctive objects. By the end of the camp students will have an actual 3D rendering of their uniquely designed model to take home. This will certainly make an impression on friends and family. There is no prerequisite for this camp.
