Mathematics Student Engagement Scholarship
Renita D Mitchell
Project Goal and Brief Description

Students receive a tuition & book (renewable) scholarship, and interact with faculty in the Math Dept, who serve as mentors. They volunteer in the community and learn indirect skills like how to be a good researcher, create resumes, engage professionals in their field of study, etc.

1st & 2nd Semester
- Internship in MATHWORLD
- Community Service – Ex: Women Breaking Thru Conference

3rd & 4th Semester
- Learn how to do Literature Review from Math & Statistics Journals
- Community Service – Tutoring in area Secondary Schools (of students choosing)
Student Testimonial

- The SEG scholarship has immensely helped me financially. Also, the scholarship has helped by having different workshops for us in the summer so that we will be fresh on our information coming into the fall. It has helped inspire some of my future goals and giving us a better understanding of the details of our career so that we will be properly equipped when we finish our degrees.

- Being part of the SEG Grant has opened so many doors for me in my education and life goals. The funds have allowed me to continue going to school and work towards my Associates. The Grant has also allowed me to give back to my community and tutor in the campus’s Math world, which for me has been a great experience.
Thanks.
