WATER RESOURCE SCIENCE

OUR MOST VALUABLE NATURAL RESOURCE
ABOUT THE PROGRAM

The Water Resource Science program prepares students for employment in the water treatment industry. Students will monitor, troubleshoot, and chemically clean equipment that is essential for the treatment of water/wastewater. The program centers on project-based learning in which students are introduced to the public health aspects of potable water supply, operation of wells, process control procedures, techniques and equipment, advanced water mathematics, water treatment systems, water treatment plant equipment, water analysis pretreatment membranes, ion exchange, reverse osmosis, and other high purity technologies. Upon degree completion, students will obtain the technical and scientific knowledge to obtain licensure in this field of study.

ADMISSIONS

We have an open door admissions policy to ensure that every person has the opportunity to get a college education.

TYPES OF AWARDS OFFERED

Associate of Applied Science (AAS)
Certificate
Marketable Skills Award
The following titles are examples of careers associated with this program but not limited to: Water Treatment Plant Operator, Waste Water Operator, Water Plant Operator, Process Operator.
