Technical and Educational Training

We deliver dynamic and sustainable vocational and technical training infrastructure designed to equip citizens of all ages with the skills and knowledge to become highly competent and productive members of the workforce.

Sector courses may include both an English and a Technical Program: half of the course will be in English, and the other half will be in technical training. Along with all of the sectors, English as a Second Language is available and one of the most requested courses.

Technical and Educational Sectors

Advanced Manufacturing & Logistics
Health and Biosciences
Science & Technology
Public Service
Creative & Communication Arts
Business & Entrepreneurship

Customizable Training to Stay Ahead of the Competition
Course Delivery Formats

Programs from the sectors are designed and delivered through a variety of methods that are customized to training and educational needs of the student:

- Hosted programs at the Alamo Colleges District in San Antonio, Texas, USA
- Hybrid or fully online programs
- In-Country training provided by the Alamo Colleges District faculty on-site

“The experience I had at the Alamo Colleges District was incredible, from the first to the last day. It exceeded my expectations.”

Carlos Orlando de la Huerta Gaytán
Student of the Aeronautical Electronic Systems Engineering Program
Universidad Aeronáutica en Querétaro (UNAQ)
