

Sharing your Video (camera) within Zoom

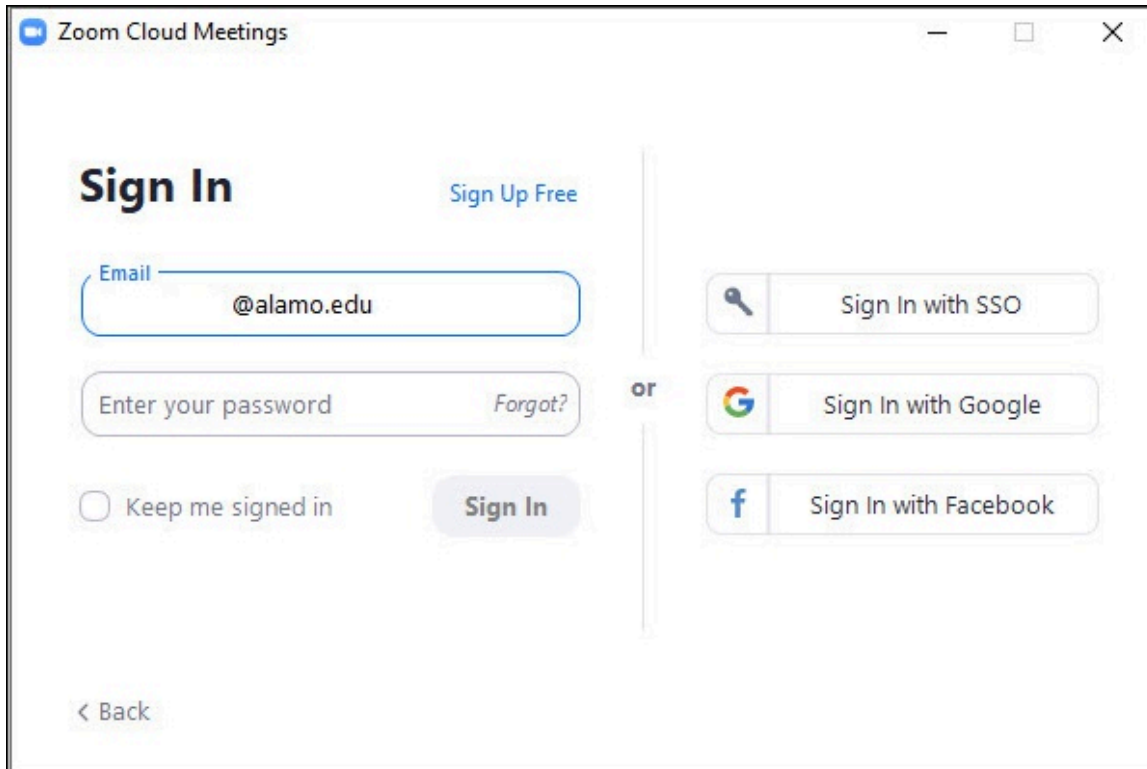

Enabling your video/camera within Zoom can be done before a Zoom meeting begins or during a meeting. Sharing your video adds presence to any meeting or presentation.

- i** If you are using Zoom within your course your instructor may ask you to share your camera/video as part of the assignment requirements.

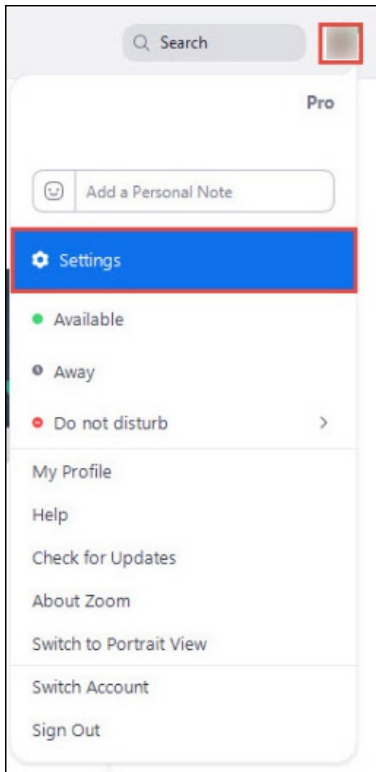

Before the meeting begins

- i** This method of testing your video and camera settings will use the Zoom desktop application. The Zoom application is a [separate download and installation](#).

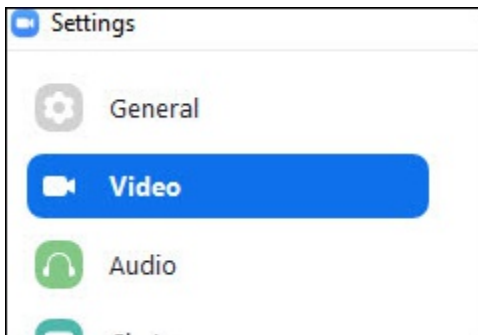

You can test your video camera in Zoom before joining a meeting by using your Zoom desktop application. Sign in to the Zoom client.

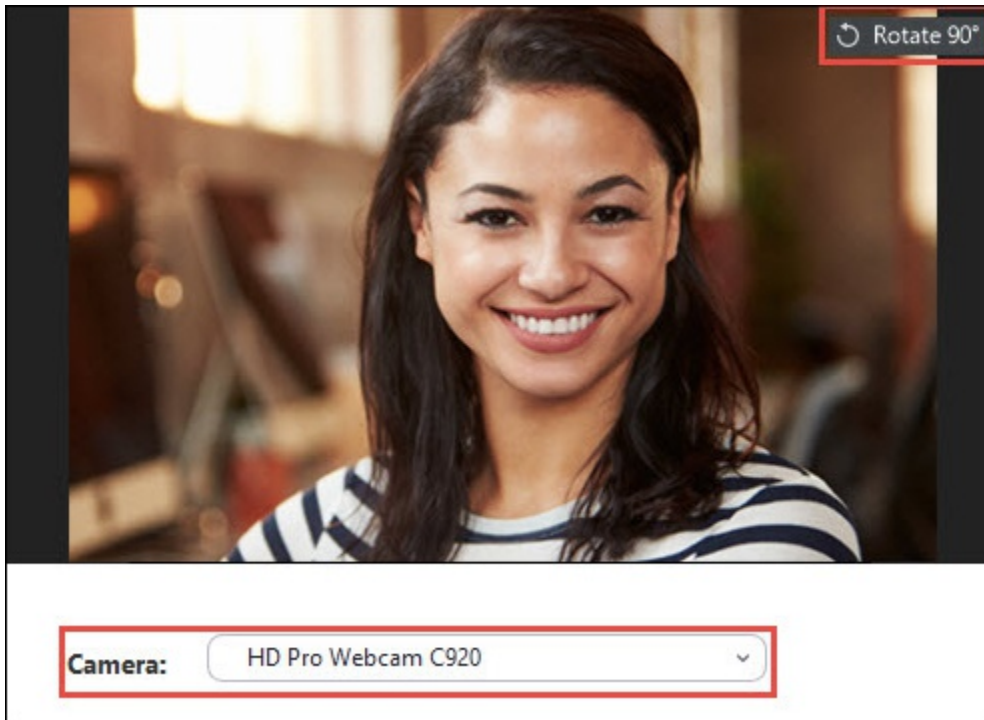

Click your profile picture then click **Settings**.

Click the **Video** tab.

You will see a preview of your camera.

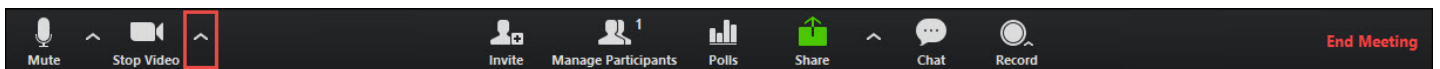

If you don't see your camera's video, click the drop-down menu and select another camera.

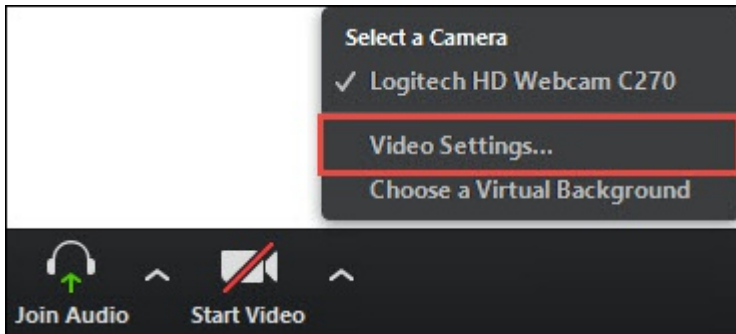

i If you need to rotate your image then click in the upper right-hand corner.

During a meeting

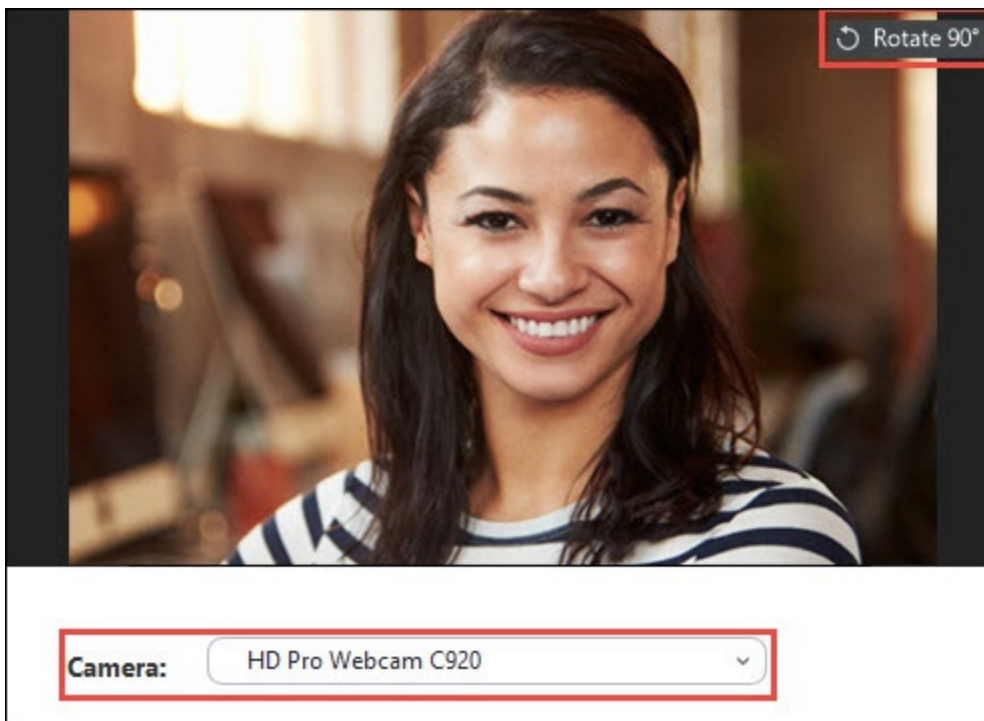

Click the arrow next to **Start Video/Stop Video**

Select **Video Settings**

Zoom will display your camera's video and settings.

If you don't see your camera's video, click the drop-down menu and select another camera.

i If you need to rotate your image then click in the upper right-hand corner.
