

Thank you for your interest in the Palo Alto College Veterinary Technology Program (PACVTP). It is our goal to train ethical and technically superior Licensed Veterinary Technicians (L.V.T.'s).

We are a two-year, professional program, located on the Palo Alto College campus in San Antonio, Texas. Students will complete 60 credit hours of intense classroom and laboratory training, to include a 320-hour clinical practicum to receive an Associates of Applied Science degree in Veterinary Technology, as well as a Veterinary Assistant Level II Certificate. Students completing the Associate of Applied Science degree in Veterinary Technology are eligible to take the Texas Licensed Veterinary Technician Exam (L.V.T.E) and the Veterinary Technician National Exam (VTNE) to become a credentialed L.V.T.

As a veterinary technology student, we expect you to treat this program as your profession, be prepared to dedicate class preparation and study time equivalent to that of a full-time job. Our program is strenuous, it will require time management skills, self-initiative, and will demand full commitment from you in order to be successful. We pride ourselves in producing high quality technicians that the veterinary field demands.

The veterinary field is one of the fastest growing health career fields in America. All students may not be granted admittance even with completion of all admission requirements. Due to the growing interest in veterinary medicine, admittance to our program has become very competitive. We require applicants to complete and submit all requirements **beginning January 1 and ending June 1**. Only 50 qualified applicants are chosen for entrance each Fall semester using the selection process noted in this packet. All students are notified of their admission status on or before June 15.

All accepted applicants, as well as a select number of alternates will be invited to attend a mandatory orientation session that will be held Thursday, **July 15, 2021**. Additional orientation information will follow after selected applicants have been notified of their status.

Monthly information sessions and tours of the Veterinary Technology building are available for interested students. At these sessions, students will have an opportunity to ask any questions about the program and admission process. Information regarding dates and times for these scheduled sessions are in this packet. Please feel free to contact the department with any additional questions.

Sincerely,

*Leanna Ruiz*

Veterinary Technology Program

# Admission Process Check List for New Students

---

New applicants are required to submit their **completed** application packet with all supporting documents. Application packets are accepted January 1 – June 1 for the upcoming fall semester. The **completed** application packet deadline is June 1 by 5 p.m. and are to be submitted via email only to [lgarcia539@alamo.edu](mailto:lgarcia539@alamo.edu)

Incomplete applications, as reflected by missing items from the checklist, will not be considered for acceptance into the program unless a completed application packet is submitted by the deadline.

Initial each requirement once you have completed.

\_\_\_\_\_ **1. Apply to Palo Alto College:**

- a. Apply to Palo Alto College at [www.applytexas.org](http://www.applytexas.org)
- b. Declare the specific major of “Veterinary Technology” under the AAS option.
- c. Welcome Center at 210-486-3100 if you have any questions

\_\_\_\_\_ **2. Submit OFFICIAL TRANSCRIPT from all, non-Alamo Colleges District, institutions to Records and Transcripts office:**

- a. All courses taken at alternate colleges or universities must be submitted via official transcripts.
- b. The applicant is responsible for acquiring/submitting official transcripts.
- c. Records and Transcripts at 210-486-3700 if you have any questions

\_\_\_\_\_ **3. Complete required prerequisites:**

- a. Composition I- ENGL 1301, and Biology for Science Majors I- BIOL 1406, College Algebra-Math 1314, General Psychology-PSYC 2301. **NOTE: (Humanities can be taken if schedule allows, required prior to graduating)**
- b. All must be completed with a “C” or better, for admission into the program.

\_\_\_\_\_ **4. Submit UNOFFICIAL TRANSCRIPT from all, non-Alamo College District, institution(s) to the Veterinary Technology Program:**

- a. Previous courses taken at any college/university must be turned into the Veterinary Technology Program.
- b. This transcript does not need to be an official copy; these can be printed from your on-line student account.

\_\_\_\_\_ **5. Submit Work Time sheet & "Proof of Clinical Experience" form:**

- a. A minimum of 80 hours of documented clinical experience is required to apply to the program.
- b. All submitted hours must be acquired within 12 months of the application due date.
- c. The hours must be completed under the supervision of a D.V.M. or L.V.T. only
- d. Shelter hours are acceptable as long as the hours are obtained in the clinic area and with a D.V.M. supervisor.
  - i. **Acceptable proof of clinical hours includes BOTH:**
    - a. Time sheet: Submit either the time sheet included in this packet or a computer printed time sheet from your clinic only. If any other form is submitted it will not be accepted. Must include the total number of hours worked and the D.V.M. signature only.
    - b. “Proof of Clinical Experience” form: A D.V.M. or L.V.T. must sign the form included in this packet only.

\_\_\_\_\_ **6. Have D.V.M./L.V.T. submit a Request for Reference form:**

- a. Each applicant is responsible for procuring a signed "Request for Reference" form, included in this packet. This form must be completed by a D.V.M. or L.V.T. only from the clinic that the hours were completed.
- b. **Once the form is complete:**
  - i. The D.V.M. or L.V.T. must submit the completed form via their work email address only to [lgarcia539@alamo.edu](mailto:lgarcia539@alamo.edu).
  - ii. If this is received from the applicants' or any email other than the D.V.M. or L.V.T email address, the form will not be accepted.

\_\_\_\_\_ **7. Submit completed application packet to Palo Alto Veterinary Technology Program:**

- a. Submit “Veterinary Technology Program Application” form included in this packet with all other documents to be considered for admission to the program.
- b. Every applicant applying must be a student in good standing and have a minimum **cumulative** GPA of 2.5 to be considered for admission.
  - i. Exception: applicants who hold any college degree may have a minimum **cumulative** GPA of 2.0 to apply.
- c. Applying to PAC and declaring your major as “Veterinary Technology” does not automatically submit your application to this program.

\_\_\_\_\_ **8. Submit Essential Functions/Technical Standards form**

- a. Read and acknowledge by signing the Essential Functions/Technical Standards form included in this packet.

## **Applicant Selection Process**

After meeting all requirements for Palo Alto College & the Veterinary Technology Program, selection of candidates will occur based on the applicants' level of college education, total GPA from all institutions, number of clinical experience hours earned, and the D.V.M./L.V.T. reference form.

### **Applicant Status**

Following the selection process, applicants are ranked accordingly. Each applicant will be classified in one of the following four statuses:

**Accepted:** The 50 highest ranked applicants who have met all application requirements.

**Alternate:** A select number of completed applicants that did not rank in the top 50 accepted but will be invited to attend orientation.

**Pending Alternate:** Any remaining completed applicants not chosen for orientation or still lacking/pending application requirements after June 1 or turned in after the June 1 deadline.

**Denial:** Any applicant who did not meet the cut off of being chosen to attend orientation or did not meet application requirements. An explanation to the applicant will be stated in the status letter.

Once all applicants are ranked, they will receive a letter stating their application status **VIA email only**, no later than **June 15** of the application year.

All "Accepted" and the selected "Alternate" applicants will receive an "**Acceptance Form**" included with their letter. **On this form, the student must accept or forgo their status by the deadline provided and return via email only to Lgarcia539@alamo.edu.** If an applicant declines, or fails to reply by the given deadline, it will be assumed that the applicant has chosen to forgo their status, and the next completed alternate will move up in rank. See "Alternate Protocol" for further details.

### **Alternate Protocol**

In the occasion an accepted student forgoes their acceptance, a position in the Fall semester will become available. The order of occurrence for which alternates will be offered an "Accepted" status is as follows:

- The highest ranking alternate will be offered the position **via email only**, and must respond by the given deadline. If that applicant declines, or if additional positions become available, we will continue down the alternate list in order of highest to lowest ranking.
- "Pending" applicants will not be considered for acceptance until their application requirements have been completed. **\*These applicants will not surpass an alternate who had a completed application packet by the June 1 deadline. As "pending alternate" applicants complete their application requirements, their status will be re-evaluated.**

## **Additional Information**

If a student has applied, and was not accepted and wishes to reapply to the program the following year, they will be required to complete the full application process again which will include an additional 80 or more clinical experience hours. All submitted hours must be acquired within 12 months of the application due date.

If a student applied and was accepted but did not attend any veterinary technology courses and wishes to reapply to the program the following year, they will be required to complete the full application process, which will include an additional 80 or more clinical experience hours. All submitted hours must be acquired within 12 months of the application due date. These students will only be allowed to reapply and be accepted to the program **once more** as a new student to the program.

## **Other Information**

### **What makes a competitive application?**

**Total GPA**-Your total GPA will be calculated by ALL college courses completed throughout your college career. Maintaining the highest GPA possible is recommended for a stronger application. All application points will be added to your total GPA.

1. **Degree**-Applicants with proof of a completed degree will be awarded additional points depending on level of degree.
2. **Total number of Clinical Experience hours obtained**-Applicants who complete more than the 80 required clinical experience hours will be awarded points for additional hours worked.
3. **Reference form**-You will be awarded points based on your evaluation by the D.V.M./L.V.T. after obtaining your clinical experience hours. Better performance equals a better reference from your D.V.M./L.V.T.

### **What will be needed once I have been accepted?**

1. **Physical Exam & Current Tetanus**: Once accepted into the program, you will be required to provide a copy of a current physical exam and immunization record showing proof of current tetanus, within 10 years, prior to being enrolled in the program.
2. **Recommend Rabies Prophylaxis vaccination** series for all PACVTP students at the student's expense. Documentation verifying rabies vaccination series is requested prior to registration for the fall semester. If any student declines the rabies prophylaxis for whatever reason, a waiver is signed by the particular student and placed in the permanent file.
3. **Complete required paperwork prior to orientation**: If accepted, required paperwork will be included in the orientation packet provided to you, and will be due prior to the mandatory orientation.
4. **Attend the mandatory orientation**: All accepted applicants, as well as a select number of alternates will be invited to attend a mandatory orientation that will be held **July TBD, 2021**. **If you do not attend this orientation, we will assume you have decided to forgo your acceptance and your position will be offered to the highest-ranking alternate.**
5. **Order scrubs & other equipment**: Full uniform(s) and related equipment (see handbook under accessories) are not optional and must be ordered by the provided deadline. You must have your uniform in your possession prior to classes starting.
6. **Order textbooks**: You must have all required textbooks in your possession prior to classes starting. **Textbooks are not optional** and are necessary for your success in this program. Discounted bundles may be purchased at Orientation.

---

**\*\*Required Prior to Graduation:** All required prerequisites as well as the and Humanities/Creative Arts Elective (Language, Philosophy & Culture Humanities [40] Core or Creative Arts [50] core) courses must be completed concurrent with or prior to the completion of the veterinary technology curriculum. If this course is not completed, prior to the completion of the veterinary technology curriculum, the student will not be awarded a degree and will not be eligible to take the state and national credentialing exams. Students are responsible for registering, keeping track of, and successfully completing all general education courses.

# Veterinary Technology Program

## Proof of Clinical Experience

**Deadline: June 1, by 5:00pm**

This is to certify that \_\_\_\_\_ has completed/observed \_\_\_\_\_ hours in my clinic within the last year, which meets the program requirement minimum of 80 hours.

We have verified the following items:

Discussed	Observed	Performed	N/A	
				1. Anticipated wages for a Licensed Veterinary Technician
				2. Working hours for a veterinary technician
				3. Benefits: vacation, continuing education allowance, uniform allowance
				4. Rewards of being a veterinary technician
				5. Challenges associated with the job position
				6. Observation of minor surgical procedures: abscess drainage, laceration repair
				7. Observation of major surgical procedures- large or small animal
				a. Small animal- castration, ovariohysterectomy
				b. Large animal- C-section, displaced abomasum
				c. Observation of dental prophylaxis procedures
				8. Observation of the technician's role in:
				a. Anesthesia
				b. Surgical assisting
				c. Sample collection
				9. Office procedures: appointment scheduling, invoice preparation, cash management
				10. Client interaction: history taking, client education
				11. Kennel or stall clean-up
				12. Animal medicating
				13. Euthanasia (if possible)
				14. Surgery pack preparation, instrument clean-up, sterilization of surgery items
				15. Laboratory procedures: parasitology, hematology, serology
				16. Miscellaneous procedures: anal sac expression, ear cleaning

Palo Alto College  
 Veterinary Technology Program  
 Request for Reference  
**Accepted ONLY: January 1 thru June 1**  
**Deadline: June 1 by 5:00pm**

\_\_\_\_\_, is requesting that you serve as a reference for his/her application  
 (Printed Applicant Name)

for admission to the Veterinary Technology Program. To assist us in evaluating his/her application, please complete the following information and submit via email to [Lgarcia539@alamo.edu](mailto:Lgarcia539@alamo.edu) from the **D.V.M./L.V.T. work email address only**. This form will not be accepted if it is from any other email address. **Do not return this form to the applicant.**

In completing the form, please rate the applicant in comparison to other employees you have known.

	Exceptional	Above Average	Average	Below Average
Dependability/ Punctuality				
Enthusiasm				
Technical Skills				
Communication Skills				
Cooperation with co-workers				
Probability of success in a veterinary technology program				

How long have you known the applicant? \_\_\_\_\_ Year(s) \_\_\_\_\_ month(s) \_\_\_\_\_ week(s)

Please make any comments that you think would assist the program in evaluating the candidate's application.  
 (e.g., strengths and/or weaknesses. If more space is needed, please use the back of this sheet)

How would you rank the applicant for recommendation for the Veterinary Technology Program?

- \_\_\_\_\_ Highly recommend
- \_\_\_\_\_ Recommend
- \_\_\_\_\_ Unsure of recommendation
- \_\_\_\_\_ Cannot recommend

Must be signed by the D.V.M. or L.V.T.

*Equal Education Opportunity: Alamo Colleges is committed to provide equal educational opportunities for all qualified persons without regard to race, color, sex, pregnancy, religion, creed, national origin (including ancestry), citizenship status, physical or mental disability, age, marital status, sexual orientation, gender, transgender status, gender identity, gender expression, veteran or military status (including special disabled veteran, Vietnam-era veteran, or recently separated veteran), predisposing genetic characteristics, domestic violence victim status, any other protected category under applicable local, state or federal law, or persons who have opposed discrimination or participated in any compliant process on campus or before a government agency.*

## ***Essential Functions/Technical Standards***

The field of Veterinary Technology is both intellectually and physically challenging. A candidate for the profession of veterinary technology must have abilities and skills in many different areas. The list below is illustrative and may not be inclusive of all of the essential abilities that the veterinary technician must demonstrate.

The Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act of 1973 ensure that qualified applicants have the ability to pursue admission to this program. In order to be qualified for the Veterinary Technician Program, an applicant must be able to perform certain essential functions as set forth below. Every student in the Veterinary Technician Program will be held to the same standards, **with or without** reasonable accommodation.

### **General Physical Requirements** - Students must:

- Possess the physical ability to
  - Tolerate walking and standing for at least ten minutes at a time, multiple times per hour.
  - Lift and/or carry up to 50 pounds from floor to waist level or higher, several times per day.
  - Lift objects/animals weighing up to 50 pounds to a height of one meter or higher and carry the object/animal for a distance of two meters without assistance.
  - Use hands and arms to handle, install, position, and move materials, equipment, and supplies without assistance.
  - Handle, position, and restrain live animals of small and large animal species.
- Be able to have sustained contact with multiple species of animals and be amenable to learning the safe handling, restraining, and working with these animals. An individual should not be allergic to any species of animals to the extent that would prohibit working in a facility that has them.

### **Cognitive Ability** - Students must:

- Be able to function in a structured environment within significant time constraints and capable of making rapid decisions in urgent situations and meeting deadlines.
- Possess a willingness to assist with and perform a wide variety of routine medical, surgical, and diagnostic procedures common to the veterinary setting; including humane euthanasia and handling of sick, injured, fractious, or aggressive animals without fear.
- Be able to complete required tasks/functions under stressful and/or unpredictable conditions, including emergency situations.
- Be able to access information from books, reference manuals, computers, and paper and electronic medical documents to perform duties and safely use equipment without assistance.
- Be able to prioritize, organize, and utilize time-management skills to perform tasks.
- Evaluate, synthesize, and communicate diagnostic information to the attending veterinarian and/or staff.
- Be able to progress toward minimal supervision as they advance through the program.

### **Communication Skills** - Students must:

- Read, write, speak, and report accurately and effectively in English.
- Comprehend and carry out complex written and oral instructions given in English.
- When communicating verbally with other individuals, either in person or by telephone, be able to make legible and coherent written notes, in English, within the margins and space provided on the appropriate forms.

### **Professionalism and Interpersonal Skills** - Students must:

- Demonstrate professional and socially appropriate behavior; maintain cleanliness and personal grooming consistent with close human and animal contact.
- Be able to interact appropriately with clients and all members of the veterinary healthcare team.
- Have the ability to exercise good judgment and make appropriate professional and procedural judgment decisions under stressful and/or emergency conditions (i.e. unstable patient condition), emergent demands (i.e. stat test orders), and a distracting environment (i.e., high noise levels, complex visual stimuli, aggressive animals).

### **Manual Dexterity and Mobility** - Students must:

- Be able to move his/her entire body a distance of no less than three meters within two seconds of a signal to do so, to move rapidly from danger while handling animals in confined spaces.
- Possess fine motor movements in order to perform the *essential functions* of the profession. This includes the dexterity to manipulate small equipment, adjust resistance on equipment, hold hooves while cleaning and evaluating, manage syringes, catheters, and common surgical instruments.

- Possess tactile ability necessary for physical assessment and to perform nursing duties in a timely manner. This includes performing palpation during physical exams, administering oral, intramuscular, subcutaneous, and intravenous medication, insert and remove tubes, collect organic samples from live animals and perform wound care.
- Possess the ability to palpate and interpret findings, i.e. palpation of pulses, lymph nodes or trachea to determine proper endotracheal tube size.
- Be able to hold surgical instruments in one hand and perform fine movements with such instruments. This includes ability to assist in holding of hemostats or other instruments while assisting in surgery; induce and monitor general anesthesia in an animal patient; place intravenous and urinary catheters without assistance.
- Be able to hold, manipulate, or tie materials ranging from a cloth patch to a very fine string. This includes the ability to hold and manipulate a surgical sponge; tie a 00 silk suture; endotracheal intubation; intravenous injection; catheterize animals to obtain sample of urine and/or other body fluids; apply bandages without assistance.

#### **Auditory, Olfactory, and Visual Skills** - Students must:

- Have functional use of senses to safely and correctly assess patients and interpret and record data.
- Possess adequate visual ability, with or without correction, that allows the determination of minute areas of detail, very small variations in color and adequate depth perception (size, shape and texture), including differentiation of details as viewed through a microscope. This includes ability to characterize and interpret the color, odor, clarity, and viscosity of body structures and fluids, observe variations in skin and mucus membrane color, integrity, pulsations, tissue swelling, etc.
- Possess visual ability to allow for observation and assessment as necessary in nursing care both from a distance and close by in order to recognize physical status and non-verbal responses including behaviors.
- Possess auditory ability necessary to monitor and assess health status, including auscultation of heart and lungs, and hear equipment alarms and warning sounds from animals, humans, and/or equipment of impending danger or injury.
- Recognize and respond appropriately to distress sounds from animal and alarms/warning signals on animal-monitoring equipment directly and through intercommunication systems to ensure patient safety.
- Detect and respond appropriately to odors in order to maintain environmental safety and patient needs.
- Be able to use a compound microscope to identify cells and organisms and be able to differentiate colors of stained objects.
- Be able to observe movement at a distance ranging from 30-45 centimeters to 15-20 meters at a discrimination level that permits detection of subtle differences in movement of the limbs in animals. This includes ability to detect and describe a change in color of hair coat caused by licking or trauma; detect abnormal head posture in a parakeet; monitoring respiratory rate during anesthesia; ability to read anesthesia-monitoring equipment.
- Be able to discriminate shades of black and white patterns in which the band is not more than 0.5 mm in width. This includes ability to characterize bacterial hemolysis on a blood agar plate; density patterns on a radiograph; and ability to see ECG tracing.
- Possess adequate depth perception to allow detection of a 0.5 cm elevation, which is no more than 1cm in diameter on a slightly curved surface having a slightly irregular surface. This includes detection of tissue swelling on the hip on a smooth-haired dog; determining presence of reaction to skin testing for allergies.
- Be able to perceive the natural or amplified human voice without lip reading to permit oral communication in a surgery room with all occupants wearing surgical masks.
- Be able to perceive the origin of sound as needed to detect movement of large animals in a pen or corral; monitoring multiple patients in an ICU.

#### **Disability Access Statement**

In accordance with the Americans with Disabilities Act (ADA) of 1990 and Section 504 of the Rehabilitation Act of 1973, it is the responsibility of the student to self-identify that he/she has a disability and request accommodations through the campus Disability Support Services (DSS) Office. Only those students with appropriate documentation will receive a letter of accommodation from the DSS office. Instructors are required to follow only those accommodation and/or services outlined in the letter of accommodation. For further information, please contact Cindy Morgan, Sr. Coordinator, at the DSS office at (210) 486-3027 or visit the DSS office located in the Palomino Center room 116.

PACVTP students are required to meet all physical and intellectual requirements as outlined above. ***Once documented with DSS, it is the student's responsibility to notify each instructor of their disability so that the appropriate accommodations can be made. Documentation must be on file at PACVTP before any special accommodations can be made.***
