Connecting your iPad Device to a Wireless Network

1. Open Settings by touching the Settings icon on your iPad’s home screen.

2. Tap Wi-Fi. Make sure the switch is in the “on” or green position.

3. Select a network to join simply by tapping the name of the network. If a lock icon appears next to the name of a network, then enter the password and tap Join.
4. Enter your Alamo College Student Email, and then tap Log In.

5. Look for the Wi-Fi icon in the upper left corner of your iPad. This icon shows your iPad is connected to a network. The more bars you see on the icon, the stronger the signal.
