## Connecting your Windows 7 Device to a Wireless Network

1. On right side of task bar, you will see a wireless network icon like the one pictured. Click on it.

![Wireless network icon](image)

2. A window with available network connections will open. To refresh the list of available networks, click on the button highlighted in the screenshot below.

![Available network connections](image)

3. Windows 7 will show the following: network name, signal strength, the type of wireless security used (if any) and its Service Set identifier (SSID).

   Click on Alamo Guest. If you plan to use that network in the future, make sure you check the box that says ‘Connect automatically’. This way, when you start your laptop next time, in the same area; it will automatically connect to this wireless network without requesting any manual intervention. Next, click on the Connect button.
