### Sample annotated bibliography for journal article in an online database:

Ollove, Michael. "Why Some Patients Aren't Getting Palliative Care." *Stateline.org*. 10 July 2017. *LexisNexis Academic*. Accessed 15 July 2017.

In this article discussing palliative care, Michael Ollove argues how patients can save money and improve their quality of life. He addresses the problem that palliative care is often confused with hospice care. Ollove also provides a clear definition of what palliative care is. Additionally, the author supports his argument by providing examples of where palliative care programs have benefited patients. The article is helpful to my research, because I plan on discussing why this type of treatment should be available people to people worldwide. Ollove highlights the ways that palliative services increase patients' satisfaction, and also cut down on hospital visits, saving them thousands of dollars annually. Palliative care is relatively new to the field of medicine, and there is still some confusion as to what it is and who should receive it. Ollove's article helps me understand the importance of palliative care, and the challenges preventing it from becoming available
