

## Admission Requirements

It is required that all Medical Laboratory Program applicants follow the procedures below. Any interested student must first apply for admission to the college and have completed the two prerequisite courses and then they may apply for admission into the program. Unsuccessful completion of all items within the mandated time-frame will preclude the application and therefore the application will not be considered for admission review.

- Meeting criteria for selection does not guarantee admission to the program. Final selection will be based on the applicant pool and space available.
- Complete application packets for the program must be submitted and postmarked by USPS by May 31.

### **Application packet to include:**

- Completion of the program application
- Completion of the TEAS exam
- Writing a one to two-page essay detailing "Why?" your interest in this program
- Submission of all official transcripts from all colleges attended (see application checklist for more information)
- An interview will also be performed as part of the application process

By submitting an application packet, an individual verifies that he/she has:

- 1) Read this web page
- 2) Obtained all necessary documents
- 3) Understood the procedures to be followed for admission into the Medical Laboratory Technician program
