

LVN/Military to ADN Mobility

Technical Standards and Essential Functions Form

Health Science programs establish technical standards and essential functions to ensure that students have the abilities required to participate and potentially be successful in all aspects of the respective programs. Students are required to meet technical standards and essential functions for the LVN/Military to ADN Mobility program as indicated below. A physical will be required from your physician stating you are able to meet the standards listed here. If an applicant or student is unable to meet all the outlined standards, he/she may be withdrawn from the program.

A student enrolled in LVN/Military to ADN Mobility Program MUST be able to meet the following standards:

Categories of Essential Functions	Definition	Example of Technical Standard (Not Limited to)
Observation	Ability to participate actively in all demonstrations, laboratory exercise, and clinical experiences in the professional program component and to assess and comprehend the condition of all clients assigned to him/her for data collection and intervention. Such observation and information usually require functional use of visual, auditory, and somatic sensations. Use of the senses enhances a nurse's ability to accurately observe the client.	Visual (corrected as necessary): <ul style="list-style-type: none"> • Able to read small print on dials and LED displays and set parameters on medical client equipment. • Able to visually discriminate postural, musculoskeletal, and color changes. • Recognize and interpret facial expressions and body language • Assess the environment at a distance. Auditory (corrected as necessary): <ul style="list-style-type: none"> • Recognize and respond to soft voices, auditory timers, client call bells and emergency alarms. • Distinguish between normal and abnormal lung and heart sounds, take blood pressure. Tactile: <ul style="list-style-type: none"> • Palpate a pulse and detect changes or abnormalities of surface texture, skin, muscle tone, temperature and locate boney prominences.
Communication	Ability to communicate effectively in English using verbal, non-verbal and written formats with faculty, other students, clients, families, and all members of the healthcare team.	<ul style="list-style-type: none"> • Able to elicit information effectively and sensitively. • Communicate orally and in writing as well as demonstrate behavior that indicates sensitivity to others. • Recognize, interpret, and respond to nonverbal communications. • Transmit information to clients, fellow students, faculty and staff, and members of the healthcare team.
