Program Title: High School Program Summer Opportunity
Summer 2020

2020 HSP Summer Implementation

- **Currently enrolled ECHS/DC students** will be allowed to take up to two (2) classes (current high school offerings/repeat class) during summer I & summer II at the rate of \$100 dollars per course, in addition to instructional materials cost.
 - + Includes Academies and home school students (does not apply to graduating seniors)
 - + All courses as part of this program must be taken on college campuses. (due to COVID-19 Summer 2020 courses will be provided remotely).
 - + **No additional classes specific to High School Programs will be added at this time.**
 - + Must have a Course Agreement already in place for students to participate. New Agreements will not be created for Summer 2020.
 - + Students should consult with High School staff to ensure they are enrolling in the correct classes that align with their respective programs. Some colleges may not enroll students without district approval. (All students should contact the HSP team at the respective college for further guidance)

- **Payment of Classes**
 - + Districts or individual students **will be responsible for all course and instructional materials charges related to class(es)** taken as a participant in the Summer Opportunity program.

 - + **Preferred method of billing**
 - Alamo College District (ACD) would prefer to invoice school districts directly when possible. If districts are not covering the cost of enrolled students, costs will be passed on to individual students (as per ISD established guidelines). Invoicing will include \$100 per student per course, in addition to related IM fees where applicable.
 - Home School students will continue to follow designated process as done in Fall and Spring.

 - ACD Business Office will communicate with the School Districts/Charters/Individual Students to provide the appropriate cost and deadlines for payment to be paid. Invoices will be sent July 16th for both summer sessions.

 - Questions should be sent directly to:
