6. Create a strong password and click continue.

**Password Safety Tips:** The longer and more unusual the password, the harder it is to guess. Avoid using common phrases and repeating passwords from other online accounts (banks, email address, social media, etc.).

**Note:** Clicking *Show Password* will allow you to view the characters in the password entry field instead of asterisks. Please be cautious and use good judgement when using this feature as it takes away a level of privacy when creating the password.

You will now need to select a second layer of security so only you can sign in to your account.

**Note:** Government employees should select the Government Employee ID option and non-government employees should select the phone option.

7. Select *Government employee ID*.
8. Click *Continue*.

**Note:** Each authentication method will have its own setup instructions which will be presented after clicking *continue*. Follow the instructions to complete the creation of the account.
