Here are important words of truth, or nuggets of information:

1. What’s the problem with drinking? Alcohol affects feelings - sometimes as soon as the first drink. A person can suddenly become angry, depressed or happy. Alcohol can also lower judgment and self-control.
2. Treatment has three parts: The person must stop using the drug and receive treatment for withdrawal symptoms if necessary. The person must learn how the drug worked in his or her life. The person must learn how to avoid using the drug again.
3. Good reasons not to drink or use drugs: You avoid embarrassment. (You won’t throw up, say or do something you regret or get arrested.) It’s safer. You lower your risk of injury and death (from car crashes, fights, alcohol poisoning and overdose). You don’t break the law. You do better at school or work.
4. The person who is drinking is not the only person who is at risk.
5. Get counseling. Treatment works.
6. Suicide: Alcohol, used alone or with other illegal drugs, can increase a person’s risk of suicide. Drinking can make bad feelings last longer or seem worse. People who use alcohol to deal with depression are less likely to get help.
7. Murder: Guns, angry feelings and alcohol are a dangerous combination. Two out of three murder victims are killed with guns. Most murders happen when two people get into an argument that turns into a fight.
8. Alcohol and angry feelings can lead to physical abuse among families, friends and dating partners. When guns or other weapons are involved, the violence can lead to serious injury or death.
9. Eight out of ten rapists know the person they rape. Often the rapist, the victim, or both have been drinking.
10. Someone who is drinking and feels angry might be more likely to argue, fight or be violent in other ways.
11. Call 911 if you think you or someone you know has been given a date rape drug. Stay with the person until
help arrives.

12. Using drugs can make it hard to learn and remember things. School or work may seem harder. You can even get more colds and flu.
13. Refusing a drink is easier if you plan what you will say ahead of time and practice.
14. Taking too much of a prescription drug or using it with other drugs or alcohol can cause the drug to interfere with important body functions such as breathing, heart rate and blood pressure.
15. Binge Drinking: Drinking a lot in a short amount of time, often with the intention of getting drunk.
16. The only thing that can get alcohol out of the system is time – about one hour for each drink. Black coffee, a shower or fresh air won’t sober someone up.
